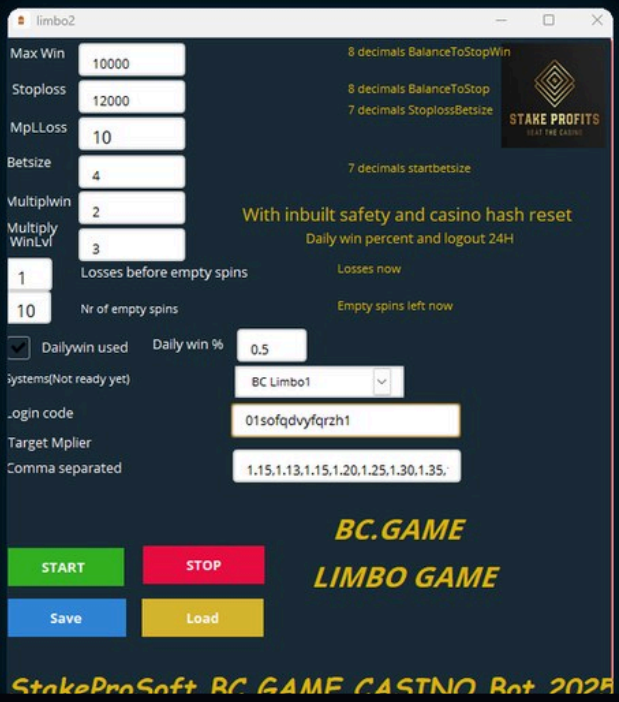
BC.Game Casino Limbo Bot 2027

BC.Game Limbo, automated



BC.Game's Limbo screen is different from Stake. So we built a bot just for it.

See the bot | **Browse the shop**

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

> Limbo is simple: pick a target multiplier; if the round passes it, you win stake × target.

> Rotating a set of low targets is a common approach — but the house edge applies to every one, so limits matter most.

2. Bankroll checklist

- Start with tiny stakes on your own latency
- Rotate a short target list (defaults about 1.13–1.50)
- Win multiplier with levels-before-reset keeps streaks in check
- Daily win % logout locks good days
- Only play with money you can afford to lose
- Write your limits down before the session starts

> 🚀 Set your targets and stops once — the BC.Game Limbo Bot places bets, rotates targets and enforces the walls.

3. What the bot automates

- Uses BC.Game's own bet and multiplier fields with cookie login
- Editable target list rotation
- Win multiplier with levels-before-reset; loss multiplier on losing rounds
- Stop-loss and max-win hard stops with alerts
- Daily Win % → logout + 24h wait, can run 24/7 on Windows

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
