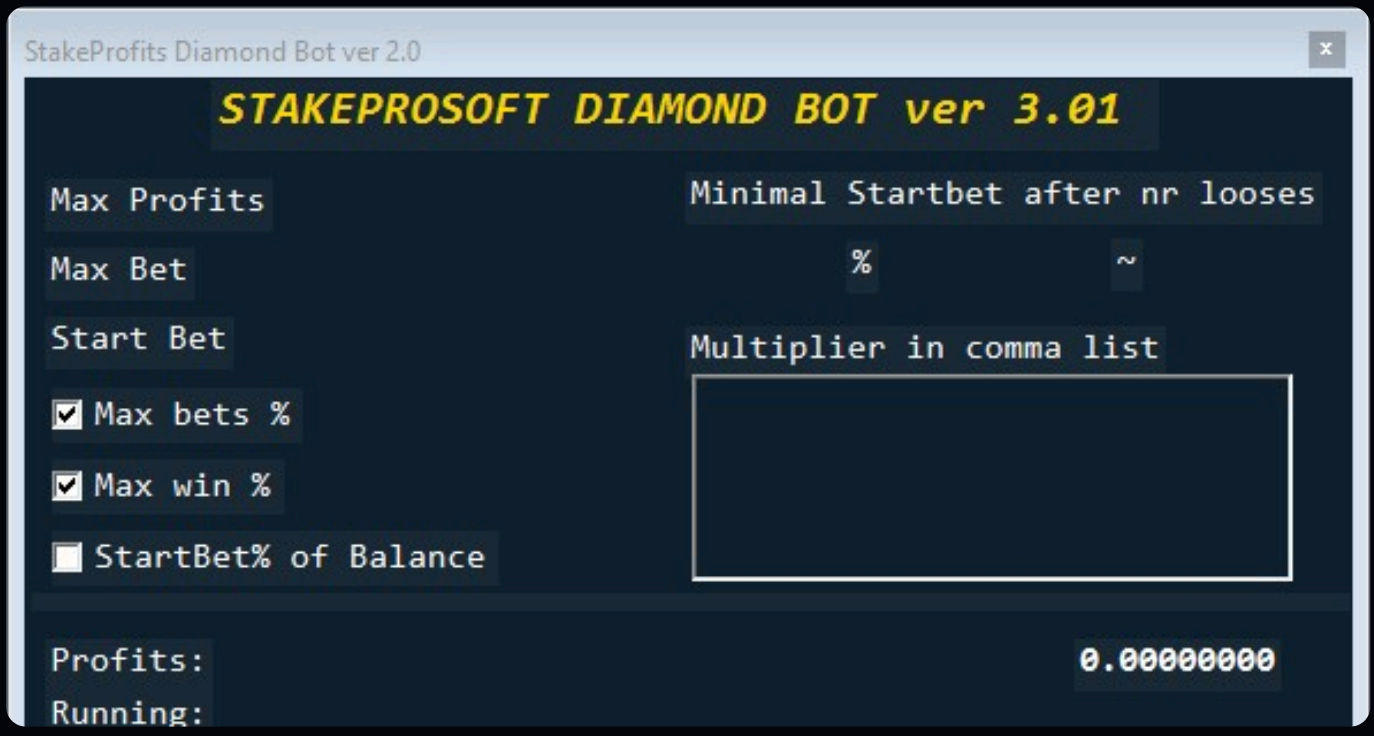
Stake Diamond Bot — Lifetime 2027

Stake Diamonds: know your multipliers



Five gems, fixed payouts from 0x to 50x. The game is fast — your progression decides how long you last.

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

Each round reveals gems; matching colours set the multiplier. Outcomes are fixed values such as 50x, 5x, 4x, 3x, 2x, 0.1x and 0x.

Big hits are rare and most rounds pay little or nothing, so stake size and progression matter far more than any feeling about the next round.

2. Bankroll checklist

- Write your progression as a short, gentle multiplier list
- Use a minimal start bet after N losses to cool down streaks
- Cap max bet and max profits per session
- Log out on session or daily win %
- Only play with money you can afford to lose
- Write your limits down before the session starts

💎 Even with AI on, the Diamond Bot keeps its hard walls. Max bet and stop limits always come first.

3. What the bot automates

- Start bet as absolute value or % of balance
- Max Bet, Max Profits, Max bets %, Max win %, Session % and Daily Win %
- Multiplier progression as a comma list, skip windows after losses
- Logout / login timing with random delays
- Optional OpenAI or Claude for careful bet-size tweaks — never to predict a round

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
