Chain Roulette Bot — Lifetime 2027

Chain roulette: playing the long session

The chains strategy is built for long, calm sessions — if your stakes and stops are set right.

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

> European roulette has 37 pockets and a fixed house edge. Every spin is independent, so no system removes that edge — on average roulette loses.

> A chained progression spreads recovery over a queue of steps after losses instead of doubling at once. That only works when start bets are low enough to absorb drawdowns.

2. Bankroll checklist

- Keep start bets tiny relative to your wallet
- Use a daily win % target and log out when it’s hit
- Set a wallet stop: restart or stop when a bet reaches X% of balance
- Short, paced sessions beat marathon runs
- Only play with money you can afford to lose
- Write your limits down before the session starts

> 🔗 Chains are about patience. The bot paces bets, resets fairness and enforces your wallet stop — the parts humans skip when tired.

3. What the bot automates

- Roulette Chains PRO 1.5 predictor with a lifetime licence plus a Stake clicker that reads bets via OCR
- multipliers.txt recovery queue after losses
- Daily Mode with daily win % and 24h return, random time between bets, log out / log in ranges
- Fairness hash reset after lost-bet ranges, Instant Bet option
- Live stats: balance, streaks, profits/24h, worst loss streak

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
