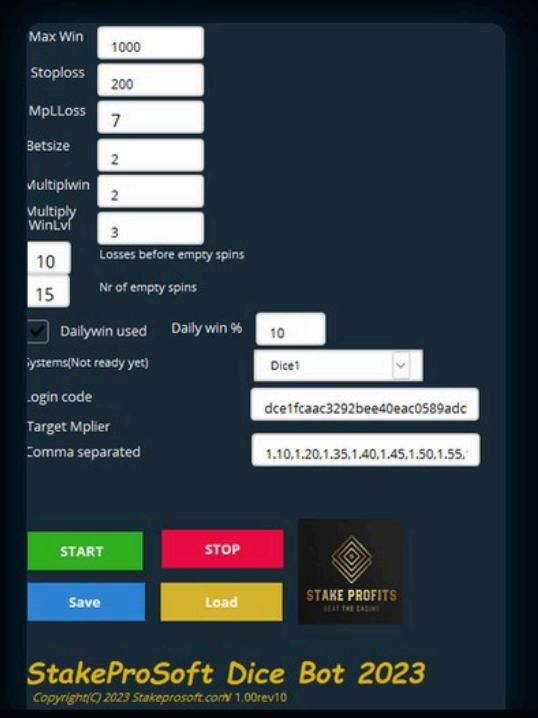
StakeProSoft Dice Bot 2027

Stake Dice: simple game, serious rules



Pick a target, press bet, repeat. Dice is easy — doing it with discipline for hours is not.

1. How the game works

> In Dice you choose a target multiplier; low targets win often and pay little, high targets win rarely and pay more.

> The house edge applies to every target. Your levers are target choice, stake size and when you stop.

2. Bankroll checklist

- Rotate a short list of low-to-mid targets you understand
- Reset to base bet after set win levels
- Hard stop-loss and max-win, every session
- Use daily-win mode to walk away on good days
- Only play with money you can afford to lose
- Write your limits down before the session starts

> 🎲 No fake AI layers — just clear, steady rules that the bot follows on every single bet.

3. What the bot automates

- Editable target multiplier list (defaults about 1.20–1.70)
- Bet size, multiply-on-loss, multiply-on-win, reset after win levels
- Stop-loss and max-win with on-screen alerts
- Daily Win % → logout and 24-hour wait, then return
- Three profile slots for your own systems

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
