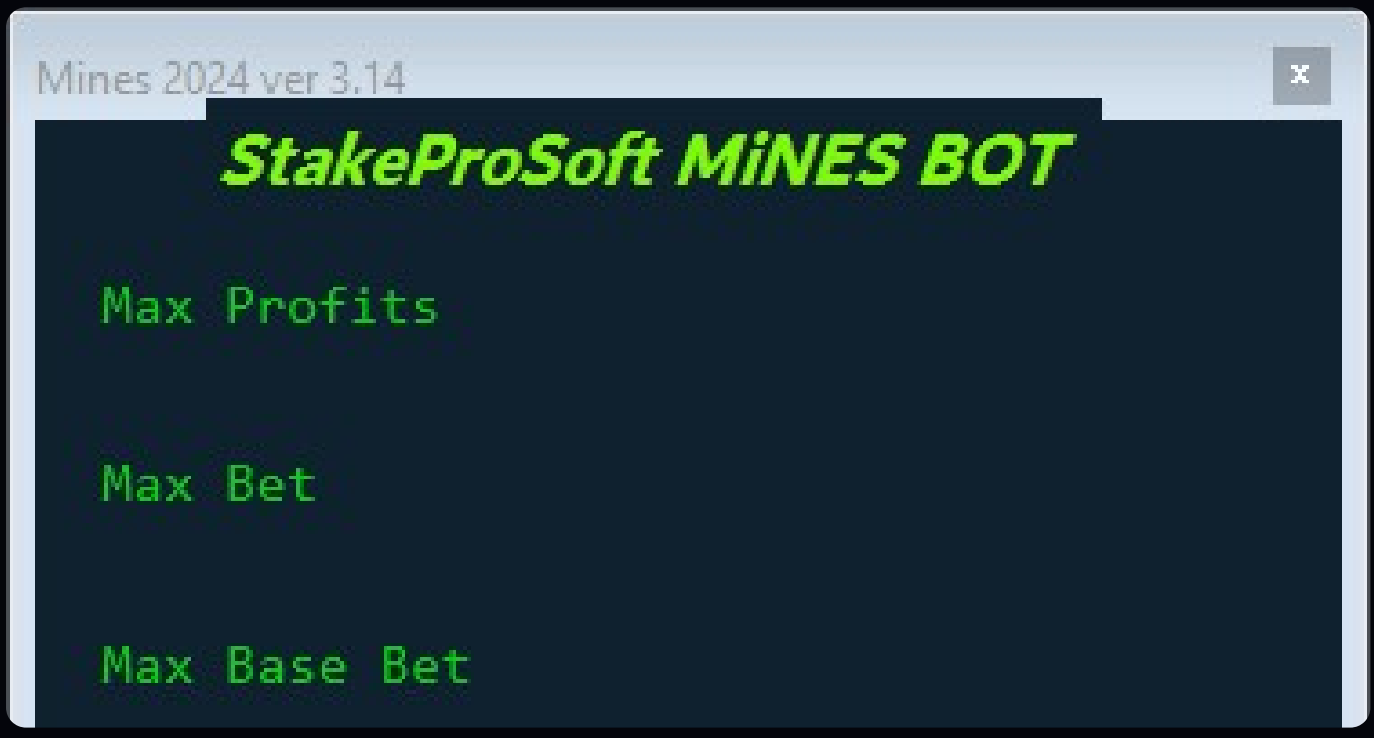
Stake Mines Bot 2027

Stake Mines: the art of the cash-out



A 5×5 board, a number of hidden mines, and one question every round: one more tile, or take the money?

See the bot **Browse the shop**

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

You choose how many mines (1–24) hide on a 5×5 board, then uncover tiles one by one. Every safe tile raises the multiplier; hit a mine and the round is lost.

More mines and more tiles mean bigger multipliers and lower hit chances. The board is provably fair, so no pattern gives an edge — what you control is risk, stake and when you stop.

2. Bankroll checklist

- Choose a mine count and tile target that fits your bankroll, not your mood
- Martingale raises stakes fast after losses; Fibonacci and D’Alembert raise them more slowly
- Set a max bet stop so a streak can’t snowball
- Lock a take-profit target and respect it
- Only play with money you can afford to lose
- Write your limits down before the session starts

💣 The Mines Bot doesn’t pretend to see the mines. It handles tile picks, stake progression and stops — so you never click on tilt.

3. What the bot automates

- Presets: Safe Grinder, Martingale Sniper, Fibonacci Hunter, D’Alembert Steady, Moonshot Multi-Tile, StakeProfits Original, AI Adaptive Master
- Tile modes: Random, StaticPattern, CornerFirst, CenterFirst, EdgeSweep, HeatmapColdest
- Risk levels from Lowest (micro bets) to Extreme
- On-loss / on-win multipliers, base bet, max bet stop, stop loss and take profit
- Optional AI Adaptive mode (OpenAI / Claude)

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
