Stake HiLo Bot 2027

HiLo: bankroll beats guessing

Higher or lower — every card is an independent draw. The edge you control is *when* and *how much*.

See the bot | **Browse the shop**

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

> You see a card and bet whether the next is higher or lower. Safer calls pay less, risky calls pay more, and you can skip cards.

> Each draw is independent with a fixed house edge, so the game rewards discipline: choosing good moments to bet and sizing stakes sensibly.

2. Bankroll checklist

- Skip rounds that offer poor payouts — patience is free
- Bounded progressions only: always cap Martingale
- Paroli raises after wins, Martingale after losses — know which you run
- Review the win/loss chart after each session
- Only play with money you can afford to lose
- Write your limits down before the session starts

> 🃏 The HiLo AI advisor is built to protect, not to gamble: it can cut stakes or stop, never raise risk.

3. What the bot automates

- Staking: SmartRecovery, bounded Martingale, D’Alembert, Fibonacci, Oscar’s Grind, Paroli, Flat
- Card-hunter modes that wait and skip until an Ace or King-class spot appears
- Optional AI risk advisor that can only reduce exposure or pause
- Activity log, win/loss chart, session-cookie login, ready presets

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
