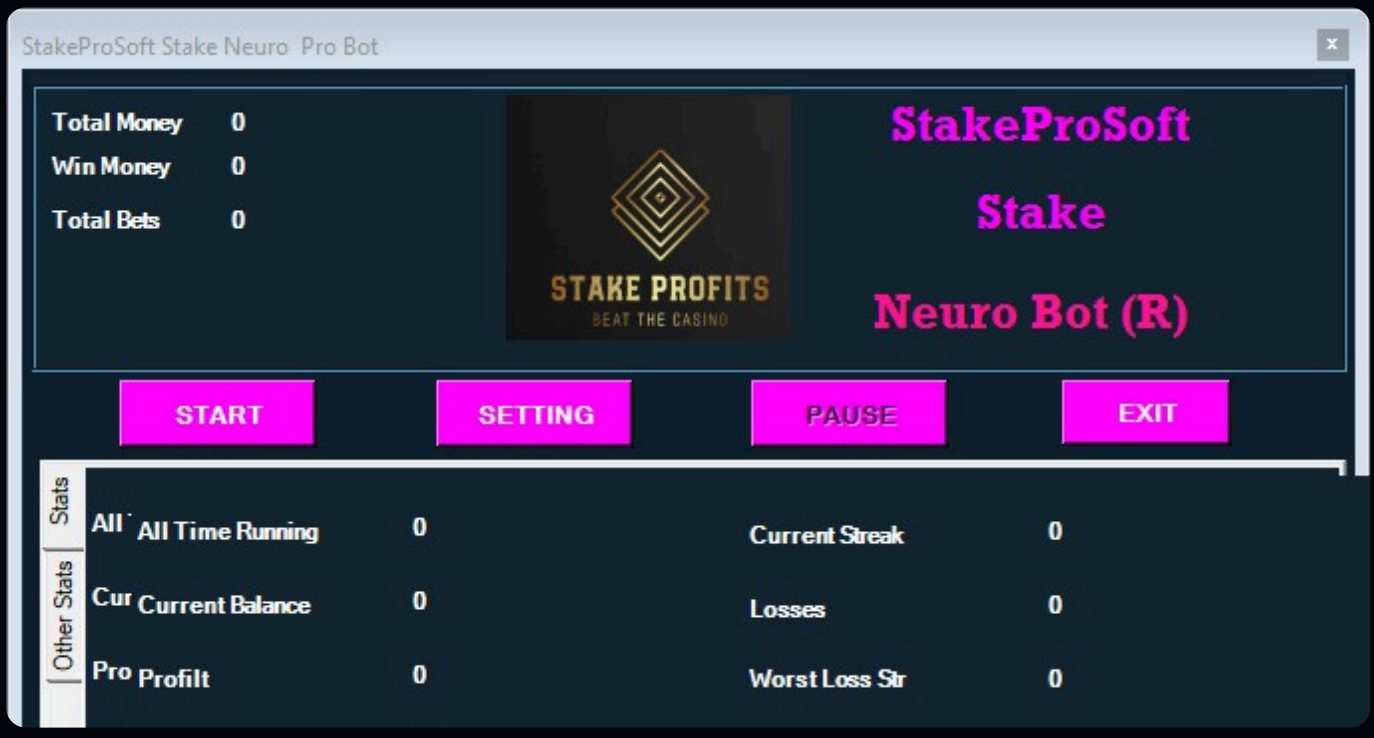
Stake Neuro Roulette Bot 2027

Neuro Roulette: short sessions win the long game



A brain-file predictor suggests bets, our robot reads and places them. Your job: set sane targets.

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

> Roulette spins are independent and the house edge never goes away. Any predictor organises bets; it can’t guarantee results.

> The manuals stress human-like pacing, short sessions, low start bets and daily win targets between 2% and 10%.

2. Bankroll checklist

- Daily win target between 2% and 10%
- Low start bets in satoshi units
- Keep sessions short and paced
- Windows scaling at 100%, hands off the mouse
- Only play with money you can afford to lose
- Write your limits down before the session starts

> 🧠 Set the predictor, close its settings, start the robot — then let pacing and daily targets do their job.

3. What the bot automates

- Clicker paired with the Roulette NEURO 1.1 BOT predictor
- Logs into Stake with your cookie or session token and feeds spun numbers to the predictor
- Reads suggested bets with OCR and places them
- Choose bet size, active fields or sectors and a progression profile in the predictor

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
