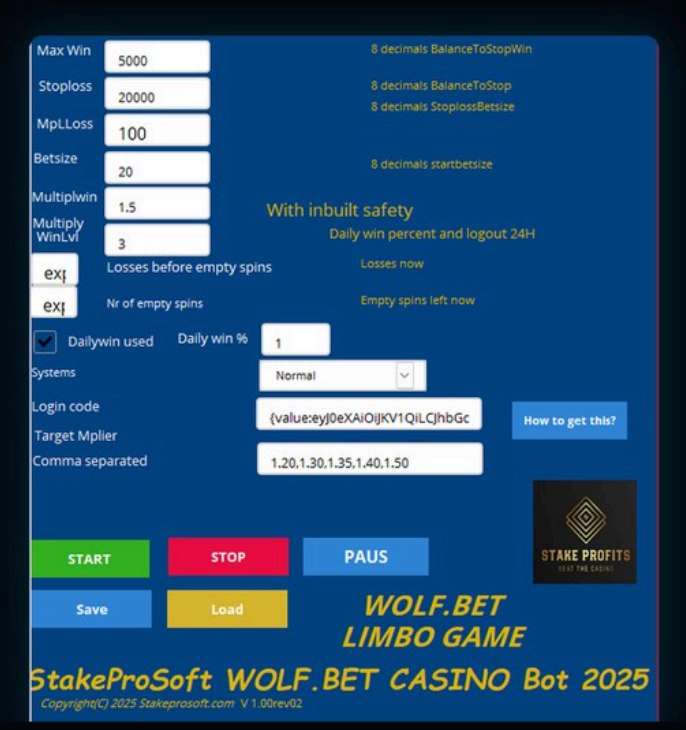
Limbo Bot 2027 — wolf.bet

Limbo on wolf.bet, the steady way



Simpler than our Stake AI line on purpose: clear rules, no paid API calls every round.

18+ · Gamble responsibly · No bot guarantees profit

1. How the game works

Pick a target multiplier, the round either passes it or not. Lower targets hit more often, higher ones pay more.

Steady rules and strict limits matter more than any single target choice, because the house edge applies to all of them.

2. Bankroll checklist

- Paste cookie, set bet and targets, choose a system, start
- Tiny stakes until you know your system on your latency
- Stop-loss and max-win on every run
- Daily win % with 24-hour wait
- Only play with money you can afford to lose
- Write your limits down before the session starts

🐺 Set it up once and leave it alone — the wolf.bet Limbo Bot follows the same rules every single round.

3. What the bot automates

- Built for wolf.bet: knows the bet input, payout field, turbo controls and live stats
- Target multiplier CSV (defaults about 1.20–1.50)
- Multiply-on-loss, multiply-on-win, win levels before reset
- Stop-loss and max-win hard stops; daily-win logout
- Two play systems covered in the English manual; runs on PC or VPS

4. Settings starter list

☐ Base bet sized for a long losing streak
☐ Progression chosen and capped
☐ Stop-loss set
☐ Take-profit / daily win % set
☐ Tested with the smallest stakes first
☐ Review after the session, not during
